INTRODUCTION

AUTOMOBILE SPECIFICATIONS

In the automobile industry, a specification is defined as any item in a detailed description of a mechanism. Usually the description is composed of separate specifications arranged in a tabular question and answer form.

Specifications of this nature, however, are not required in the manufacture of an automobile. All the information necessary for this process is given by the Engineering Department to the manufacturing and assembling plants in the forms of drawings and parts lists. But drawings and parts lists usually are not made available to other people who require information of the vehicle, since these records must be interpreted. Moreover, they and other engineering records are much too numerous or voluminous for convenient reference. Therefore, a special interpretation is made by the Engineering Department in the form of a specifications list or book, the contents of which are determined by the nature of questions people ask the Engineering Department concerning the vehicle.

As has been the experience of most manufacturers, originally the questions asked were few in number and were answered individually at the time they were asked. Through the years, however, many questions were asked quite frequently and, for convenience, the answers were recorded in the form of specifications. Others, which arose because of heightened interest and because of advancements in design were added from time to time. As the automobile grew into a necessary means of transportation - - as its component units were advanced in design and as new ones were added - - and as manufacturers were forced to make more detailed comparisons of their vehicles with those of their competitors to satisfy an increasingly technically minded public - - more and more questions concerning the characteristics of vehicles were answered in the form of specifications.

THE PURPOSE OF CHEVROLET SPECIFICATIONS

The Chevrolet Engineering Department has always been willing to answer questions of a technical nature concerning Chevrolet products and for the past twenty-six years has endeavored to anticipate such questions by preparing a specifications book each new model year.

This current book has been prepared to answer all the questions concerning the Chevrolet 1947 products that we believe may be asked.

It is intended primarily as a convenient and authoritative source of information for Chevrolet executives, engineers, sales and service representatives, plant managers, and other personnel who must be in a position to answer such questions, and also as a common source of those Chevrolet specifications that are needed in advertisements, vehicle comparisons, trade publications, license applications, and in correspondence with governments, firms, educational institutions, and individuals throughout the world who require a wide variety of information about Chevrolet products for diverse purposes.

VEHICLES AND EQUIPMENT SPECIFIED

The specifications are those of all standard left drive passenger cars, delivery cars, trucks, and school bus chassis which have been designed to be manufactured for the domestic (U.S.A.) open market. Included also are the specifications of the RPO (Regular Production Option) units which are intended for use with these vehicles. Except where noted all data are for vehicles with regular equipment. RPO units are labelled RPO, and numbered.

No information is furnished concerning right drive vehicles or equipment manufactured for export, nor any vehicles or equipment built on COPO's (Central Office Production Orders) or any other special orders. Accessories released through the Parts and Accessories Department, however, are

INTRODUCTION—Continued

listed although specifications of these are not included.

As in 1946, this book is separated into two parts -- one for passenger cars and one for trucks.

Except where noted, all information was derived directly from official Chevrolet Engineering Department drawings, parts lists, and test reports, or was calculated from these records.

ABBREVIATIONS

The condensed tabular form in which the data are presented necessitates the use of abbreviations or symbols in some cases. These are shown on a separate page.

DIMENSIONS

The dimensions shown are of three types:

Type #1. Those dimensions where very accurate fits are essential in the parts concerned, such as bearing surfaces and splines, and where dimensions usually are expressed on drawings in decimals with very close limits.

Type #2. Those dimensions where accuracy of fit is of less importance, as in structural members such as frame parts, I-beam axles, or in fuel tanks, where dimensions are expressed in fractions or integers with fractions and to which fairly large tolerances ($\pm 1/64$, $\pm 1/32$, $\pm 1/16$) are applied.

Type #3. Those dimensions, such as wheelbases, ground clearances, body size dimensions, and turning diameters, which are subject to large manufacturing variations.

In this book, the dimensions of type #1 are quoted with limits exactly as on the drawings while the dimensions of types #2 and #3 are quoted without manufacturing tolerances.

Unless specified otherwise all dimensions are in inches.

ORGANIZATION OF BOOK

Every effort has been made to facilitate the finding of information. The sequence followed in presenting the information is that of the G. M. Uniform Parts Classification major groups, modified to facilitate usage by the reading majority, who are unacquainted with this classification. The table of contents lists the subjects in the order in which they occur. The subject headings are reprinted at the bottom of each page beside the page number. The index at the rear of the book lists the details covered by the subject headings.

To provide for reorganizing or incorporating additional information without disturbing the page number sequence, blocks of numbers are assigned to the ends of the passenger and truck sections.

REVISIONS

All revisions and the dates on which they are made will be indicated at the bottom of the page on which they occur. Where it is necessary to indicate a change in an individual specification, a symbol will be placed in the proximity of the revised specification. This symbol also will be repeated at the bottom of the page with a description of the revision. The following symbols have been established for this purpose: \circ , \times , \diamond , ∇ , \star , \ominus . They may be used singly, in multiples, or in combinations.

Subsequent revisions on a revised page will be made in the same manner as described above. However, to emphasize and clarify the later changes, all symbols and descriptions pertaining to previous revisions will be removed from the page and a note including the previous date of change and the word "Revisions" will be added in the space for revision descriptions.

SERIAL NUMBERS

SERIAL NUMBER LOCATIONS
(See descriptions below.)

NOTE: Serial numbers were obtained from Standards Department.

UNITS		3100	3600	3800	4100	4400	4502	6702	6100	6400	5100	5400	5700
VEHICLE	Prefix	EP	ER	ES	QJ	QK	QL	QX	QV*	QW*	QP*	QR*	QS*
	Number	Includes symbols for assembly plant, model year, month assembled, and vehicle number. Example: 1EP-E-1234. The first figure indicates assembly plant; (1-Flint, Mich.; 2-Tarrytown, N.Y.; 3-St.Louis, Mo.; 5-Kansas City, Mo.; 6-Oakland, Cal.; 8-Atlanta, Ga.; 9-Norwood, O.; 14-Baltimore, Md.; 20 Van Nuys, Cal.; 21-Janesville, Wis.). The first two letters indicate the model prefix; the third letter, the month. The figures begin at 1001 at each assembly plant and continue in numerical sequence. Special 5000S, 6100S & 6400S series are numbered in sequence with respective 5000 & 6000 series.											
	Location	Stamped on plate on rear face of left door pillar on all models except flat face cowl which has its plate on left hand cowl inner side panel.											
REAR AXLE	Pre-fix	Detroit	Reg. EE	EG	QC	QL			QG				
		RPO			QA**	QE (RPO 204)			QN (RPO 202, 2 speed)				
	Buffalo	Reg. EF	EH	QD	QM			QH					
		RPO			QB**	QF (RPO 204)			QP (RPO 202, 2 speed)				
	Number	Includes prefix letters and calendar day of production. Example EE-0102. This indicates that axle was built in Detroit. "01" designates January; "02" designates the second day of the month.											
	Location	Stamped on front upper surface of differential carr.						Regular axle, stamped on upper face of horizontal rib of differential carrier. Two speed axle, stamped on top of differential carrier.					
ENGINE	Pre-fix	Flint	Reg. EBA	AECA		ECA			EEA			EDA	
			RPO227	BECA									
			RPO225			AEEA							
		Tona-wanda	Reg. EBM	AECM		ECM			EEM			EDM	
	RPO227		BECM										
	RPO225				AEEM								
	RPO212				ECQ								
		Number	Starts at 1001 at each plant shown and continues in numerical sequence.										
	Location	Stamped on crankcase on right hand side of engine to rear of distributor.											
TRANSMISSION	Pre-fix	Saginaw	Reg. EN	EQ			QA			QD			
			RPO	QK (RPO 318)				QG (RPO 348)					
		Muncie	Reg. EO	ER		QB			QE				
			RPO	QL (RPO 316)				QH (RPO 348)					
	Toledo	Reg. EP	ES		QC			QF					
RPO		QM (RPO 318)				QJ (RPO 348)							
	Number	All three speed transmissions are numbered in sequence starting with 1001 at each plant. All four speed transmissions are numbered in sequence starting with 1001 at each plant.											
	Location	On case at rear edge of cover.						Stamped on rear left hand side of case.					

* - QVS on 6100S series, QWS on 6400S series, QPS on 5100S series, QRS on 5400S series, QSS on 5700S series.
** - QA and QB on models 3802-03-08-12-22-32 with RPO 295.

8-29-47

VEHICLE WEIGHT DEFINITIONS

SHIPPING WEIGHT: This weight is established by the Traffic Department; it is the basic weight of the vehicle with all regular equipment and with grease and oil wherever required. It does not include the weights of gasoline or water.

CURB WEIGHT: This is the weight of the empty vehicle ready to drive. It is the shipping weight plus the weight of gasoline, water, and spare tire on models which do not include the spare tire as basic equipment.

FOR GROSS VEHICLE WEIGHT: See page 100

* - Gear reduction x engine maximum net torque x efficiency factor (.90 in direct drive, .85 all others).
 0 - Maximum capacity of shafts.

TWO-SPEED REAR AXLE (RPO 202 FOR ALL 5000-6000 MODELS)

GENERAL DATA

Type ----- Double reduction, full-floating
 Rating (pounds) ----- 13000
 Final gear ratio ----- 6.13:1 high; 8.10:1 low
 Drive torque ----- Through springs
 Housing --- Banjo, one piece seamless steel tube
 Axle shafts:
 Material ----- Forged steel
 Type ----- Shaft and drive flange integrally forged. Spline attachment.
 Minimum diameter ----- 1-9/16

PRIMARY DRIVE GEARS

Type and ratio ----- Hypoid, 2.875:1 ratio
 Pinion ----- 8 teeth, overhung mounting
 Drive gear ----- 23 teeth, straddle mounted
 Backlash adjustment ----- .008 to .013
 -By shims at double reduction pinion shaft cover

DOUBLE REDUCTION GEARS

Type ----- Helical spur
 Ratio-high speed ----- 2.133:1 (32-15 teeth)
 Ratio-low speed ----- 2.818:1 (31-11 teeth)

Dash control high and low speed vacuum shift. Lubricant capacity, refill (pints) ----- 14-1/2

BRAKES

ITEM		3100	3600	3800	4100-4400	4502	5000	6000	
Service brake type		Hydraulic, 4-wheel internal expanding, double articulating shoe.							
Hand brake type		Mechanical pull rods and cables operate two shoes in each rear brake.							
Drum Type		Composite (cast alloy iron rim and cooling ribs, pressed steel web).							
Dia.	Front & Rear	11	11 & 12	12 & 14	14 & 16				
	Area Total(sq.in.)	242	272	371	478				
Lining		Material Full molded asbestos composition							
Width	Front	1-3/4			2				
	Rear	1-3/4	2	2-1/2	3				
Thick-ness	Front	.187-.194			.265-.272				
	Rear	.187-.194						.265-.272	
Clear-ance	Front	Adjust to slight drag. Back off 4 notches							
	Rear	Adjust to slight drag Back off 4 notches			Adjust to slight drag Back off 2/3 screw turn				
Attach-ment	Front	Riveted (Bonded optional)			Riveted				
	Rear	Riveted (Bonded optional)			Riveted				
Lining area (effective)	Service brake	164 sq.in.	183 sq.in.	248 sq.in.	330 sq.in.				
	Hand brake	82 sq.in.	101 sq.in.	147 sq.in.	215 sq.in.				
Braking pressure	Front	52-1/2%	45-1/4%	50%	41%				
	Rear	47-1/2%	54-3/4%	50%	59%				
Approximate braking ratio	Pedal	6.387:1					6.31:1	6.387:1	
	Hydraulic	11.89:1	8.81:1	9.65:1	9.73:1	9.73:1			
	Av. overall	75.94:1	56.27:1	61.63:1	62.15:1	61.40:1	62.15:1		
Foot pedal	Travel	7.937							
	Mounting	On pedal shaft which is attached to side rail bracket					Same but on sub-frame	Same as 4000 Series	
	Pad	Yes							
Hand brake lever mounting		To transmission					Subframe	Transmission	
Wheel cylinder	Dia-meter	Front	1-1/4	1-1/4	1-3/8	1-1/4			
		Rear	1-3/16	1-3/8		1-1/2			
	Piston travel	.105	.141						.130
Main cylinder	Diameter	1	1-1/4						
	Piston travel	1-1/4							
Brake fluid capacity		Approximately 3/4 pint				Approximately 1 pint			
Brake fluid recommended		Delco, Super #11 or 12							
Vacuum brake booster equipment (hydraulic)	Available as					RPO 212*	RPO 212	Regular equipment	
	Type	Single piston, vacuum suspended, reactionary valve.							
	Power distribution	At 1000 PSI of hydraulic pressure, 63% by pedal and 37% by booster.							
	Pedal pressure needed for 1000 PSI of hydraulic pressure	204 lbs. without booster (actual test) 133 lbs. with booster (actual test)							
Vacuum power reserve tank	Available as	RPO 281 (used with RPO 212 on 4000)							
	Size	24 length x 7-1/2 inside diameter							
	Location	Clamped to inside of left side rail		Clamped to outside of left side rail		Clamped to inside of left side rail			

* - Used with Heavy Duty Equipment.

□ - Ratio does not include Vacuum Brake Booster Equipment.

RPO BRAKE EQUIPMENT AVAILABLE ONLY ON SCHOOL BUSES

Propeller shaft hand brake	RPO	348		
	Type	Double-face disc		
Main cylinder reservoir	Brake lining size and total area	3-7/16 inside radius x 5-7/16 outside radius x 1/4 thick x 90° arc 27.8 square inches of area		
	RPO	259		
Size	6-1/2 overall length x 3 diameter			
	Location	Left side of dash, under hood

	8.10:1		527	260	128	75	2939	4479	

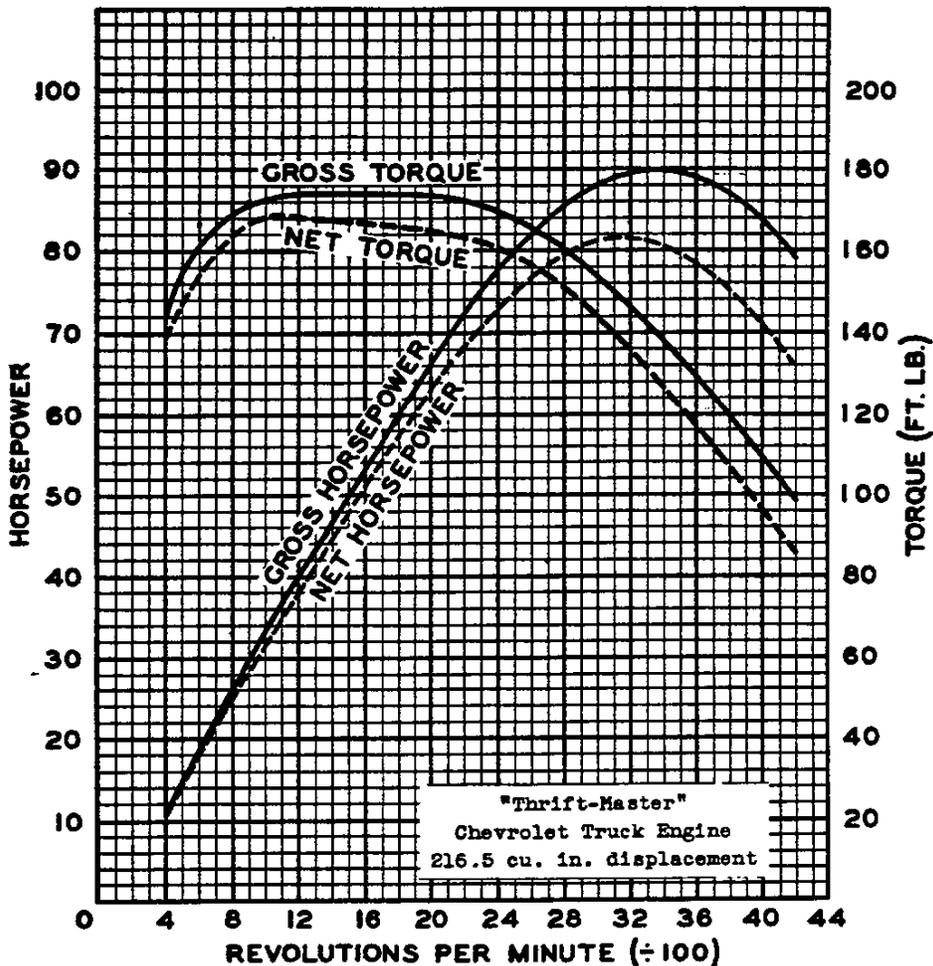

θ - Engine RPM is determined by locating the figure for one mile per hour (see chart above) and multiplying by the desired miles per hour. MPH is determined by dividing the known engine RPM by the engine RPM for one mile per hour (see chart above). δ - Also known as NV factor.

10-1-47

CHEVROLET 1947 SPECIFICATIONS—TRUCKS

ENGINE-86

ENGINE PERFORMANCE

The engine performance curves shown on this sheet are true copies from Chevrolet engine test report 9616-45. They represent the full throttle performance of a "Thrift-Master" Chevrolet truck engine (216.5 cu. in. displacement) as obtained from dynamometer test data which were corrected to the standard barometric pressure of 29.92" Hg. and the standard temperature of 60° F.

GROSS POWER and TORQUE were obtained in a regular dynamometer test with the dynamometer exhaust system, no fan, generator not charging, and optimum spark advance.

NET POWER and TORQUE were obtained from a dynamometer test simulating actual operating conditions when the engine is in its vehicle. It includes the use of the regular muffler and pipes, the fan in operation, the generator charging and automatic spark advance.

August 15, 1947

The data on this sheet are true as represented.

State of Michigan
 County of Wayne

On this 15th day of August 1947 personally appeared before me, R. B. Wuerfel, known to me to be such, who makes oath that the data on this sheet are true as represented.

Byron N. Holmer
 Notary Public, Wayne County
 My commission expires July 27th, 1951

ENGINE PERFORMANCE

The engine performance curves shown on this sheet are true copies from Chevrolet engine test report 9840-16. They represent the full throttle performance of a "Load-Master" Chevrolet conventional truck engine (235.5 cu.in. displacement) as obtained from dynamometer test data which were corrected to the standard barometric pressure of 29.92" Hg. and the standard temperature of 60° F.

GROSS POWER and TORQUE were obtained in a regular dynamometer test with the dynamometer exhaust system, no fan, generator not charging, and optimum spark advance.

NET POWER and TORQUE were obtained from a dynamometer test simulating actual operating conditions when the engine is in its vehicle. It includes the use of the regular muffler and pipes, the fan in operation, the generator charging and automatic spark advance.

August 15, 1947

The data on this sheet are true as represented.

8-29-47

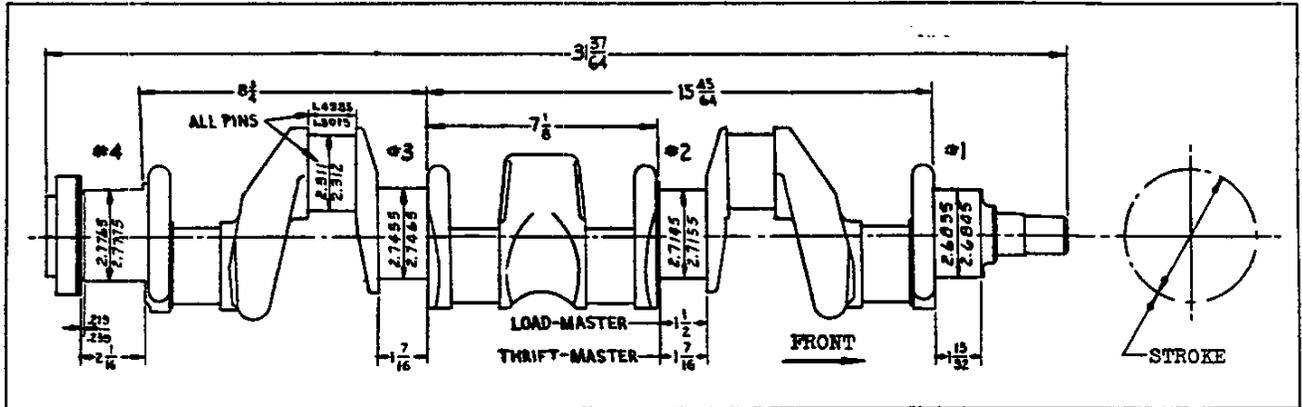

CHEVROLET 1947 SPECIFICATIONS—TRUCKS

ENGINE-89

CYLINDER AND CASE AND HEAD

Material ----- Cast alloy iron Bore diameter:
 Offset ----- None "Thrift-Master" (216.5 eng.) ---- 3.4995-3.5015
 Cyl. head bolt torque (service) ---- 70-80 ft. lb. "Load-Master" (235.5 eng.) ---- 3.5620-3.5640

CRANKSHAFT AND BEARINGS •

CRANKSHAFT

Material ----- Drop-forged steel
 Weight ----- 68 lb.
 End play ----- .004-.007
 Counterweights ----- 7
 Stroke-"Thrift-Master" ----- 3-3/4 ± .005
 "Load-Master" ----- 3-15/16 ± .005

HARMONIC BALANCER (Vibration Dampener)

Type ----- Oscillating (Rubber-floated)
 Fan drive pulley diameter ----- 6-1/32

MAIN BEARINGS

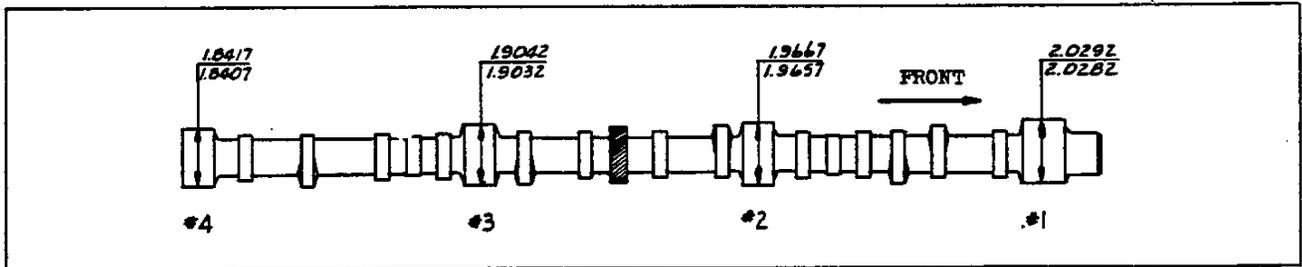

Material ----- Steel-backed babbitt

Type ----- Slip-in
 Removable ----- From below
 Necessary to align ream ----- Yes
 Clearance ----- Selective fit with solid shims
 End thrust taken on ----- #3
 Bearing bolt torque -----
 ----- 100-110 ft. lb. with oiled threads

Brg.	Inside Dia.	Length	Proj. Area*
#1	2.6865-2.6875	1-3/16	2.603 sq. in.
#2	2.7175-2.7185	1-3/16	2.633 sq. in.
#3	2.7485-2.7495	1-7/16	2.629 sq. in.
#4	2.7795-2.7805	1-5/8	3.909 sq. in.

* - Based on effective length, i.e. overall length shown above, less oil groove and chamfers.

CAMSHAFT AND BEARINGS •

CAMSHAFT

Material ----- Drop-forged steel
 Minimum diameter ----- 1-3/32
 End play ----- Free to .003 maximum
 Ramp-inlet ----- .0111
 -exhaust ----- .014

DRIVE

Make ----- Chevrolet
 Type ----- Helical gear
 Driven gear (on camshaft) material -----
 ----- "Thrift-Master", Bakelite
 and fabric composition with steel hub. "Load-
 10-1-47. 10-16-47; •-Titles corrected

CHEVROLET 1947 SPECIFICATIONS-TRUCKS

Master", sand cast aluminum alloy with steel hub.
 Drive gear (on crankshaft) material ----- Steel

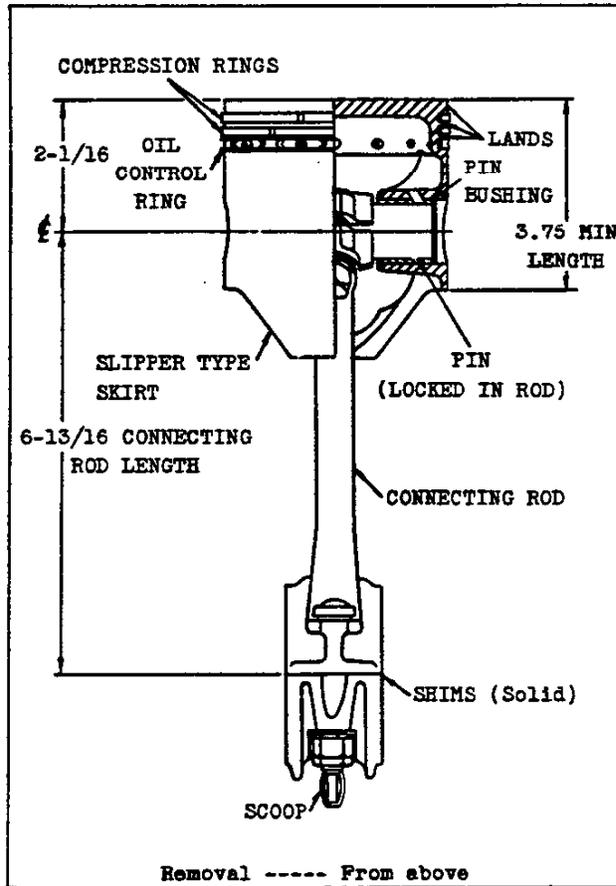

BEARINGS

Material ----- Steel-backed babbitt
 Clearance on diameter ----- .0015-.0035
 Thrust taken at ----- #1

Brg.	Inside Dia.	Length	Proj. Area ^θ
#1	2.0307-2.0317	1-1/8	2.285 sq. in.
#2	1.9682-1.9692	15/16	1.846 sq. in.
#3	1.9057-1.9067	15/16	1.787 sq. in.
#4	1.8432-1.8442	15/16	1.728 sq. in.

θ - Based on overall length shown above.

PISTON-PIN-RINGS

Oil ring groove diameter -----
 ----- {Thrift-Master engine ----- 3.118-3.138
 ----- {Load-Master engine ----- 3.180-3.190
 Oil drain holes, number and size -- 14, 5/32 drill

PISTON PIN BUSHINGS

Type ----- Pressed in piston
 Material ----- Cast bronze
 Inside dia. & finish -- Slip fit on pin, diamond bore
 Length (each) ----- 15/16
 Weight (each) ----- .06 lb.

Weights:	Thrift-Master	Load-Master
Piston alone	1.70 lb.	1.77 lb.
Piston and bush. assy.	1.82 lb.	1.89 lb.
Piston, bushing rings, pin and conn. rod upper end x 6	16.26 lb.	16.68 lb.

PISTON PIN

Material ----- Chromium steel (file hard case)
 Diameter ----- .8645-.8650
 Length ----- 3.135-3.165
 Taper limit in full length ----- .0002
 Weight ----- .32 lb.
 Clearance in bushing ----- Slip fit

COMPRESSION RINGS

Material ----- Cast alloy iron,
 surface treated with a wear resistant coating.
 Type ----- Taper face
 Number per piston ----- Two
 Width ----- .1235-.1240
 Wall thickness ----- .155 maximum
 Gap clearance ----- .005-.015
 Ring clearance in groove ----- .0015-.003
 Weight (each) ----- .05 lb.

OIL CONTROL RING

Material ----- Cast alloy iron
 Type ----- Wide-slot
 Width ----- .1860-.1865
 Wall thickness {Thrift-Master engine --- .155 maximum
 {Load-Master engine ----- .160 maximum
 Gap clearance ----- .005-.015
 Ring clearance in groove ----- .0020-.0035
 Weight ----- .05 lb.

PISTON

Make ----- Own
 Size ----- { to fit 3-1/2 bore (216.5 engine)
 ----- { to fit 3-9/16 bore (235.5 engine)
 Features ----- Flat head, oval, slipper skirt
 Material ----- Cast alloy iron,
 surface treated with a wear resistant coating.
 Head thickness at center ----- .180-.190
 Diametral relief at lands ----- .015-.023
 Skirt clearance in cylinder bore {Pass on -- .0015
 ----- {Hold on --- .003
 Compression ring groove diameter -----
 ----- {Thrift-Master engine ----- 3.155-3.180
 ----- {Load-Master engine ----- 3.2175-3.2425

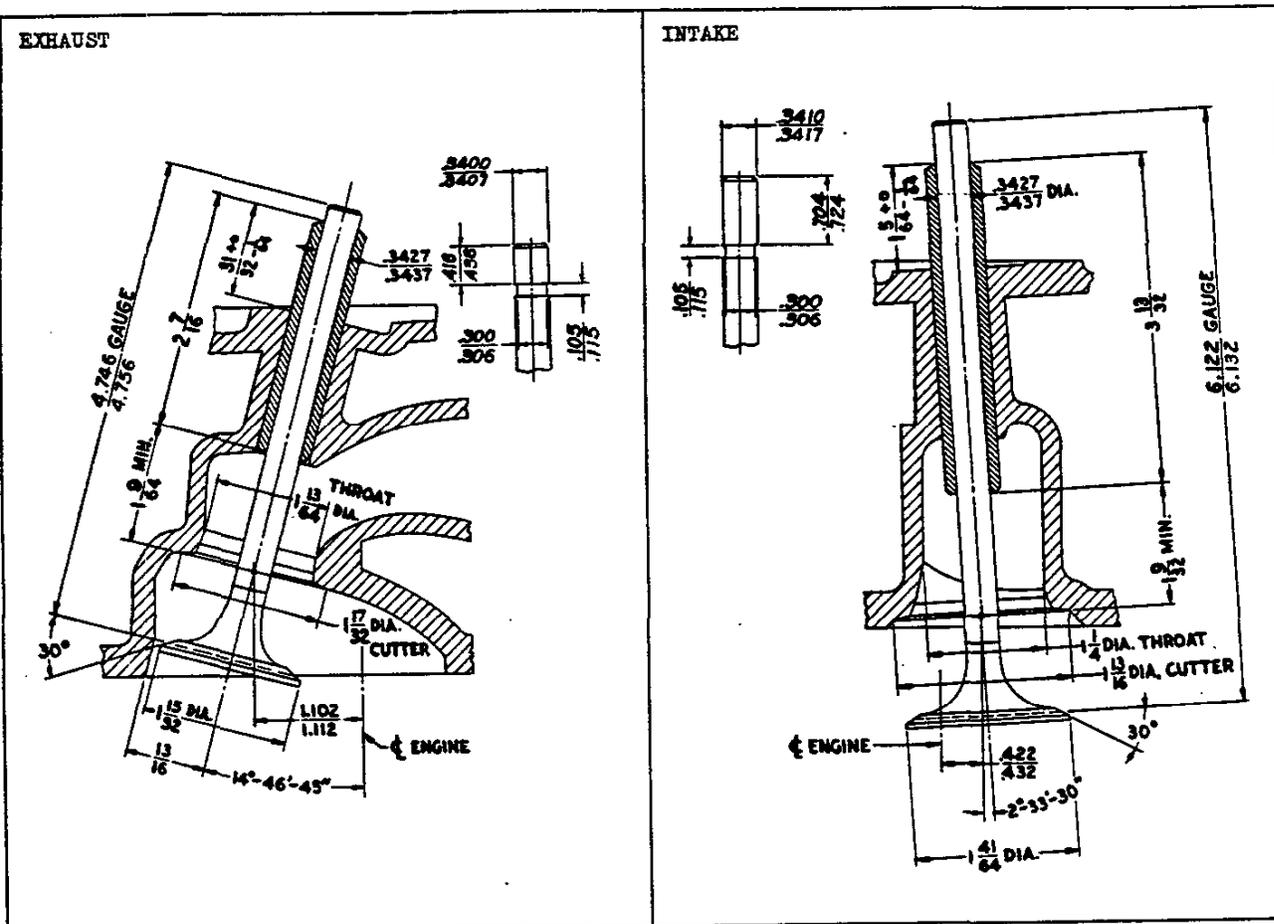

CONNECTING RODS

Type ----- Rod clamps piston pin
 Material ----- Drop-forged steel
 Assembly center of gravity, 5.322 from piston pin
 Rod width at piston pin ----- 1.125-1.127
 Rod width at crankpin ----- 1.490-1.494
 Crankpin bearing:
 Type ----- Spun (centrifugally cast)
 Material ----- High lead babbitt
 Diameter ----- 2.3135-2.3140
 Effective length --- (overall length less oil
 groove and chamfers) ----- 1.138

Clearance on diameter ----- Selective fit
 Projected area per rod -- (based on effective
 length) ----- 2.633 sq.in.
 Assembly weight: ----- 1.96 lb.
 Upper end ----- .42 lb.
 Lower end ----- 1.54 lb.
 Total rotating weight -- (weight of lower end x 6
 connecting rods) ----- 9.24 lb.
 End play ----- .004-.012
 Recommended bolt nut torque (service) -----
 ----- 40-45 ft.lb. with oiled threads

10-1-47

VALVE TRAIN

VALVES

Make ----- Own
 Material ----- Extruded steel
 Stem end style ----- Grooved for keys
 Lift-exhaust valve ----- .3118
 -inlet valve ----- .2941

Distance between valve centers -----
 - 1-21/32 (measured along centerline of engine).
 Operating tappet clearance for valve timing -----
 ----- See valve lash shown below

Lash (with engine normalized*):	<u>Inlet</u>	<u>Exhaust</u>
Regular engine up to and incl.		
8000 lb. GVW and school buses	.008	.015
Reg. engine above 8000 lb. GVW	.010	.020
RPO 224 economy engine	.010	.016

* - To normalize engine, run it at fast idle (approximately 600 RPM) until a constant oil temperature is maintained for a period of five minutes.

TAPPETS

Type and material --- Cylindrical, cast alloy iron
 outside diameter ----- .989-.990
 Lift-exhaust ----- .2111
 -inlet ----- .1991
 Clearance ----- Selective fit
 Hydraulic valve lifters ----- None

10-1-47

CHEVROLET 1947 SPECIFICATIONS—TRUCKS

VALVE STEM GUIDES

Type ----- Removable
 Clearance with stem-exhaust ----- .002-.0037
 -inlet ----- .001-.0027

VALVE ROCKER ARMS

Material ----- Malleable iron casting
 Ratio (cam lift to valve lift) ----- 1.477:1
 Torque of valve rocker shaft support bolts and nuts ----- 25-30 ft.lb.
 Bearing-type ----- Rocker arm I.D.
 -inside diameter ----- .7925-.7935
 -length ----- 15/16

VALVE SPRINGS

LENGTH AND PRESSURE

Valve closed ----- 1.821 at 54-62 lb.
 Valve open ----- 1.505 at 124-140 lb.
 Out of engine (free) length ----- 2-1/8

VALVE SEATS

Material ----- Cast alloy iron (cylinder head)
 Inserts ----- None
 Cooling ----- Jets of water under pressure
 Width in head-exhaust valve ----- .062-.093
 -inlet valve ----- .035-.060

ENGINE -92

ENGINE COOLING SYSTEM

Method of cooling cylinder walls ----- Full length water jacket with water around each cylinder.
 Method of cooling valve seats --- "Nozzle jet" system with water under pressure directed against seats.

ITEM		3100-3600	3800-4000	5000	6000	
Capacity (quarts)	Regular	15			17.5	17.5, with shroud
	RPO 256	(Not available for 3100) 17.5, with shroud				
Radiator core	Make and type	Harrison, ribbed cellular				
	Material	All copper				
	Size	Regular	.25 x .560 x 2	.20 x .560 x 2	.20 x .560 x 3	
		RPO 256	(Not available for 3100) .20 x .560 x 3			
Frontal area	407 square inches					
Radiator overflow tank		RPO 271			RPO 271	
Radiator hose	Type	Reinforced rubber, outlet consists of two hoses joined by steel tube				
	Location	Inlet	From cylinder head to radiator core upper tank, 1-1/4 I.D.			
		Outlet	From radiator core lower tank to water pump, 1-1/2 O.D. x 3-1/8			
Thermo-stat	Make and type	Harrison, bellows operating poppet valve				
	Location	In cylinder head water outlet				
	Valve action at 29" Hg.Bar. press.	Regular	Starts to open at 140-147°F.-fully open at 170°F.			
		RPO 224	(Available for 3000 only) Starts to open at 156-165°F.-fully open at 185°F.			
	Accessory	Starts to open at 148-155°F.-fully open at 173°F.				
		For permanent anti-freeze (Starts to open at 166-174°F.-fully open at 194°F. Starts to open at 178-185°F.-fully open at 210°F.)				
Engine fan	Make	Own				
	Type and size	4 staggered blades-18 diameter				
	Pulley size	28° V x 4-21/64 diameter				
	Fan to engine speed ratio	1.405:1				
	Fan belt	Material	One piece vulcanized fabric			
	Size	11/16 max. width x 42-7/8 around outside				
Water pump	Type and drive	Centrifugal, by fan belt				
	Location	On front of cylinder and case				
	Capacity	47 gallons per minute at 4000 engine RPM				
	Bearing & shaft	Make	New Departure No. 954252-Permanently lubricated ball type			
		Size	1.1806-1.1811 O.D. x 1-21/32 bearing length			
	Seal	Matl.	Moulded rubber sealed with rubber cement			
	Adjust.	Automatic, by spring tension				

FUEL TANK

ITEM	3100	3600	3800	3800-4100-4400 6100-6400	5000	4502-6702
		All	All	Pickup, Panel, Canopy	All except 3800 Pickup, Panel & Canopy	All
Mounting	Regular Clamped to inner side of right side member			RPO 379*	Regular Clamped to outer side of right side member	
Type	Two stamped pans, seam welded together				Three piece with soldered or welded seams	
Capacity	16 gallons		18 gallons		30 gallons	
Filler location	To rear of right side door location				At right side of chassis	
Fuel Gauge	Make	AC				
	Type	Electric				

* - This equipment must be specified when RPO 207 Long running board and rear fender equipment is specified on 3800.

FUEL SYSTEM—Continued

CARBURETOR

ITEM	3000	3000-4000 6000	5000
	Regular or RPO	RPO 224	Regular
Make	Carter		
Model	W1-616S	W1-574S	BB1-517S
Type	Single adjustment, balanced		
	Down-draft		Up-draft
Idle adj. Number of turns open	1 to 2	1-1/4 to 2-1/4	1/2 to 1-1/4
Size (main venturi throat I.D.)	1-1/16	1-1/4	1-1/16
Float level when closed	Top of float is 1/2 below finished surface of cover		Top of float is 1/32 to 1/16 below top of float chamber
Choke	Manual (no automatic choke)		
Supercharger	None		
Manifold heat control	Automatic (thermostatic)		
Manifold cover	Yes		

FUEL PUMP

Make ----- AC
 Model ----- AF
 Type ---- Mechanical (diaphragm "high reserve")
 Drive ----- From camshaft
 Arm throw ----- 1/4 at camshaft
 Air dome ----- Yes (inlet and outlet)
 Filter ----- 120 mesh screen in dome
 Octane selector ----- Manual, 20° range

AIR CLEANER

ITEM		3000-4000	5000	6000
Make		AC		
Flame arrester type		Reg. equip.		
Oil bath and flame arrester type	1 lb. cap.	RPO 216* except 4502		
	2 lb. cap.	RPO 216*		Reg. equip.
	4 lb. cap.		Reg. equip.	

* - Not used with heavy duty engine equipment.

EXHAUST SYSTEM

MUFFLER AND EXHAUST PIPES

Muffler make & mounting --- Various, single point
 Muffler type -- Diffusion & resonance, reverse flow
 Muffler size (outside) -- 5-1/16 diameter x 21 long
 Exhaust pipe O.D. ----- 1-7/8
 Tail pipe I.D. ----- 1-11/16

ENGINE LUBRICATION SYSTEM

METHOD OF LUBRICATION

Type ----- Chevrolet "specialized" (pressure, pressure stream and splash).
 Main bearings --- Direct pressure through drilled passages in the cylinder case to the bearings.
 Camshaft bearings ----- Direct pressure through passages from the main bearings.
 Timing gears ----- Gravity feed
 Connecting rod bearings ----- Pressure streams directed against connecting rod scoops.
 Cylinder bores and piston pins ----- Splash
 Valve mechanism ----- Pressure.
 Oil is piped from oil distributor (high pressure side) past bleed hole (to regulate pressure) and through metering hole; then through water jacket (to condition temperature) and finally to rocker shaft and arms. Valve stems, springs, and push rod ends are gravity fed from rocker arms.
 Water pump bearing -----
 -- Permanently lubricated, sealed, ball bearing.

OIL PUMP

Type and drive ----- Gear, from camshaft
 Capacity (gallons per minute, hot oil) -----
 ----- 7.16 at 4000 engine RPM
 Normal oil pressure -- 14 lb. at 2000 engine RPM
 Oil pressure relief valve opens at ----- 60 PSI

Cleaner type -- 20 mesh x .015 non-corrosive steel wire screen; by-pass in intake side of oil pump.

MISCELLANEOUS

Crankcase oil filler --- Combined with ventilator
 Crankcase breather air cleaner assy.(6000 only):
 -make and type ----- AC, copper ribbon
 -location ----- Top of valve rocker cover
 Oil level gauge ----- Rod type
 Oil pressure gauge-make ----- AC
 -type ----- Pressure
 Oil filter-make ----- AC (RPO 237)
 -capacity (dry) ----- 2-1/2 qt.
 -flow ---- Approximately 20 gal. / hr.

OIL PAN

Capacity ----- 5-1/2 qt., dry; 5-qt., for refill
 Drain ----- Plugged hole in rear of pan
 Torque, bolts, on corners -- 12-1/2 to 15 ft.lb.
 Torque, screws, on flanges --- 6 to 7-1/2 ft.lb.

LUBRICANT RECOMMENDED

Temperature	Grade
Not lower than 32° F. -----	20W or SAE 20
As low as plus 100° F. -----	20W
As low as minus 100° F. -----	10W
Below minus 100° F. -----	10W, plus 10% kerosene

10-1-47

CHEVROLET 1947 SPECIFICATIONS—TRUCKS

ENGINE-94

ENGINE ELECTRICAL SYSTEM

GENERATOR

Make ----- Delco-Remy
 Model ----- 1102667
 Type ----- 2 brush, shunt wound
 Rated voltage ----- 6 to 8
 Ventilation ----- By fan in generator pulley
 Driven by ----- Fan belt
 Pulley size ----- 28" x 3-11/32 dia.
 Speed ratio (gen. to engine) ----- 1.83:1
 Maximum output (controlled charging rate) --- Hot:
 -ampères ----- 35
 -voltage ----- See voltage regulator
 -generator RPM ----- 2400 and up
 -engine RPM ----- 1311 and up
 Bearings: Commutator end Drive end
 -number ----- 812823 ----- N.D. 903203
 -type ----- Bronze bushing ----- Ball
 -I.D. ----- .562-.563 ----- .6690-.6693
 -O.D. ----- .783-.784 ----- 1.5743-1.5748
 -width ----- 51/64 ----- .4674-.4724
 Generator speed at cut-in ---- See cutout relay
 Engine RPM at cut-in ----- See cutout relay
 Brush spring tension ----- 25 oz.
 Rotation (drive end) ----- Clockwise

STARTING

Starting device ----- Mechanical
 over-running clutch actuated directly by pedal.
 Starting operation -----
 ---With ignition switch ON, depress starter pedal.
 Pinion meshes ----- From front of flywheel
 Pinion teeth ----- 9
 Flywheel teeth ----- 139, 1/2 wide, 13.9 P.D.
 Flywheel bolt recommended torque ---- 50-65 ft.lb.
 Gear ratio (starter armature to flywheel) - 1:15.44
 Normal engine cranking RPM (60°F. air) ---- 125

STARTING MOTOR

Make ----- Delco-Remy
 Model ----- 1107061
 Direction of rotation (commutator end) -----
 ----- Counter-clockwise

Bushings	Commutator end	Drive end
Type	Bushing pressed in die cast aluminum end frame	Rolled bronze graphite
I.D.	.5625-.5635	.499-.501
O.D.	.6245-.6255	.5615-.5625
Width	.812	.779-.784

Starting motor test data -----
 ----- Lock test No load test
 -ampere draw ----- 525 ----- 65
 -volts ----- 3.4 ----- 5
 -torque ----- 12 ft.lb. -----
 -RPM ----- 5000
 Brush spring tension ----- 24 to 28 oz.

CONTINUED

VOLTAGE AND CURRENT REGULATOR

Make and model ----- Delco-Remy 1118201
 Type ----- Vibrator
 Voltage regulator:
 -volts ----- 7.2 to 7.4
 -temperatures ----- Operating
 -average air gap ----- .070
 Current regulator:
 -ampères ----- 34 to 36
 -temperatures ----- Operating
 -average air gap ----- .080
 Cutout relay:
 -voltage at closing ----- 6.2 to 6.7
 -generator armature speed ----- 800 RPM
 -engine speed ----- 437 RPM
 -ampères to open (reverse current) --- 0 to 4
 -average air gap ----- .020

BATTERY

ITEM	SCHOOL BUSES	ALL OTHERS
Make	Delco	
Model	19Q4W	15X4W
Length, at top	10-3/8	9
Width, at top	7	
Height	8-11/16	
Voltage	6	
Capacity	125 amp. hr.	100 amp. hr.
	At 20-hour rate	
Bench normal charging rate	7 amperes	
Cell arrangement	3, side-to-side	
Plates per cell	19	15
Terminal grounded	Negative	
Location	At right, on frame, under hood	At right, outside frame

IGNITION SYSTEM

Type ----- Separate units, as follows: high tension distributor ground return system with centrifugal and vacuum spark advance, high intensity spark with automatic polarity reversing switch for breaker points, waterproof coil.
 Ignition cable make ----- Packard Electric
 Ignition lock-make ----- Rochester Products
 -type ----- Three position: on, locked off, or unlocked off

COIL

Make and model ----- Delco-Remy 1115380
 Location ----- Engine right side
 Amperes drawn --- 4.5, engine stopped; 2.5, idling

SPARK PLUGS

Make and model ----- AC 104
 Thread size ----- 10 mm.
 Recommended gap ----- .040
 Recommended torque (service) ----- 12-15 ft.lb.

ENGINE-95

ENGINE ELECTRICAL SYSTEM—Continued

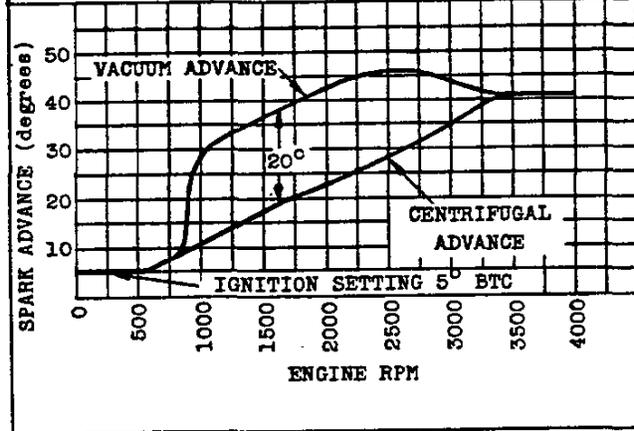

DISTRIBUTOR

Make and model ----- Delco-Remy, 1110090
 Current source ----- Generator or battery
 Breaker contact opening and nominal contact angle:
 -with new breaker lever --- .018-.024 --- 34°
 -with old breaker lever --- .015-.022 --- 39°
 Breaker arm tension ----- 17-21 oz.
 Polarity reversing switch -- On starting motor top
 Vacuum control part number ----- 1116043
 Condenser (service) part number ----- 1908757

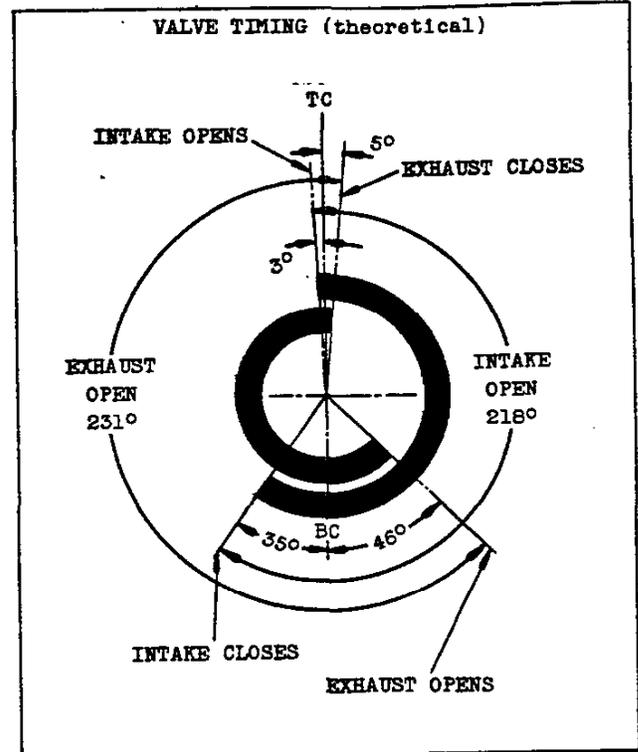

ENGINE TIMING

Timing spark advance (initial setting) ---- 5° BTC
 Timing marks location ----- On flywheel
 Firing order ----- 1-5-3-6-2-4

Automatic spark advance:	Advance begins	Full advance
Vacuum control	7" Hg. min.	20° at 12" Hg. min.
Centrifugal	600 RPM	32.5° to 39.5° at 3450 RPM and up.

CLUTCH

3100 SERIES REGULAR CLUTCH ILLUSTRATED

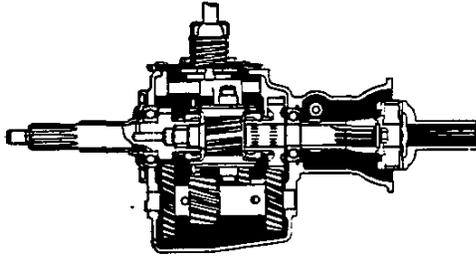

ITEM		3100		3600, 3800, 4000, 5000, 6000	
		Regular clutch	RPO 227	Regular clutch	
Type		Single dry plate			
Rated torque capacity		200 foot pounds			
Drive		Direct to flywheel face			
Ventilation		Vaness cast in pressure plate			
Diaphragm spring	Pressure in flat position	1100 to 1225 pounds	1175 to 1275 pounds		
	Material	Spring steel, heat treated			
	Pressure levers	18, integral with spring			
Discs	Driving	Two (flywheel and pressure plate)			
	Driven	One			
	Vibration insulation at hub	8 cushion springs	6 cushion springs		
	Facing	Material	Molded asbestos composition		
		Outside diameter	9-1/8	10-3/4	
Inside diameter		6-1/8	7		
Area		71.86 square inches	104.6 square inches		
	Thickness	.132-.138	.137-.143		
Bearings	Throwout (release)	Type, make, number	Special ball bearing; N.D. 909422		
		Lubrication	Packed for life		
	Pilot	Make and number	Chevrolet 412562		
		Type	Sintered graphite-bronze bushing. Oil-impregnated		
		Inside diameter	.5915-.5925		
		Outside diameter	1.0935-1.0945		
		Width	.740-.760		
Lubrication	Self				
Controls	Clutch fork type	Drop-forged (pivot mounted on ball)			
	Pedal mounting location	On shaft, bracketed to side rail (to subframe in 5000)			
Flywheel	Material	Cast alloy iron			
	Weight (with ring gear)	30 pounds			
	Ring gear type	Steel, shrunk on			
	Ring gear teeth	139, 1/2 wide. Pitch diameter 13.9			
Clutch attachment to flywheel		6 bolts	9 bolts

		Part number	N.D. 954168		N.D. 954390	
	Rear	Type	Ball			
		Inside diameter	.9839-.9843		1.3775-1.3780	
		Outside diameter	2.4404-2.4409		3.1491-3.1495	
		Width	.6643-.6693		.8218-.8268	
		Part number	Chevrolet 591211		Hyatt 142260	
		Type	Roller			
Counter-shaft bearings	Front	Inside diameter	(none - 25 rollers)		1.4998-1.5002	
		Outside diameter	.1248-.1250		2.4409-2.4415	
		Width	.735-.750		.6249-.6299	
	Rear	Part number	Chevrolet 591211		Hyatt 121856	
		Type	Roller			
		Inside diameter	(none - 25 rollers)		1.7326-1.7330	
Clutch gear bearing	Outside diameter	.1248-.1250		2.8346-2.8352		
	Width	.735-.750		.6643-.6693		
	Part number	N.D. 954388		N.D. 954373		
Second speed gear turns on main shaft	Type	Ball				
	Inside diameter	1.3775-1.3780		1.7712-1.7717		
	Outside diameter	2.8341-2.8346		3.3459-3.3465		
	Width	.6643-.6693		.7430-.7480		
Material	Steel, hardened					
	Size	1.062-1.063 I.D. x 1.886-1.888				
Power take-off gear	Type	6-bolt (SAE standard)				
	Location	On left side				
	Number of teeth	33				
	Speed at 1000 engine RPM	425 RPM				
Lubricant capacity	1-1/2 pts.		5-1/2 pts.

⊖ - Base equipment (regular) is the vehicle with specified basic tires of same size and ply on front and rear wheels.

All tires shown for each series are available in any front and rear combination provided tires of a larger size or ply rating are not used on the front, and provided front, rear and spare wheels remain interchangeable.

* - The Maximum Gross Vehicle Weight Rating as warranted by the chassis manufacturer shall include the truck chassis with lubricants, water and full tank or tanks of fuel, plus the weight of the cab or driver's compartment, body, special chassis and body equipment and payload.

A plate is supplied with each vehicle which shows the chassis number and maximum Gross Vehicle Weight (GVW). These GVW ratings are reduced when rear tires of lesser capacity are used.

⊖ - RPO 380 is a special plate which indicates 12500 GVW on 4100 and 4400 series. This GVW can only be obtained by the use of the following regular production options: 267-auxiliary springs, 212-hydraulic brake booster, 233-heavy duty frame (on 4100 only), 7.00-20-8 front tires (standard or RPO 300), 304-7.50-20-8 dual rear tires, and 230 high sill platform (on all platform or stake models). Without all of the above equipment no increase over 11000 GVW is allowed.

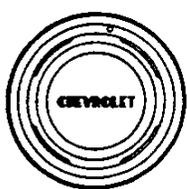

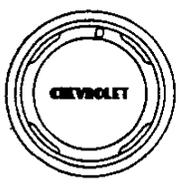

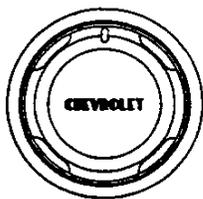

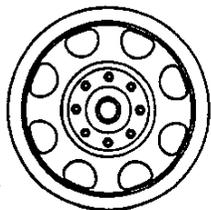

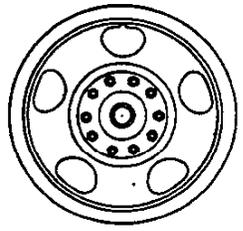

⊖ - Mud and Snow Tread.
